Lightning Learning Session

Lightning Learning sessions utilize the principles of adult learning by chunking content in to “bite-sized” segments– short, to the point, and aimed at a limited attention span.

Lightning Learning sessions are presented in an intimate, informal learning environment that promotes idea sharing and encourages movement and discussion.

Attendees are invited to sit back and relax as invited speakers present a 15-minute session. Successful Lightning Learning sessions:

- Focus on narrower topics that are problem-centric
- Provide “how to’s” and “quick tips”
- Offer 3-5 key concepts attendees can walk away with that fuel their quest for more knowledge on your hot industry topic
